

# TOTAL TRAINING™ FOR ADVANCED DREAMWEAVER® 8

## QUICK REFERENCE GUIDE

### 1 THE MANY WAYS TO DESIGN A WEB PAGE 33:05

- 1 Comparing the Sites Used in the Training
- 2 Getting Started with Site Setup
- 3 Visual Aids & Tips for Designing with Tables
- 4 Controlling Window Size
- 5 Introducing Guides & Navigation Tools
- 6 Status Bar, CSS Styles, & Layer Preferences
- 7 When to Use HTML Tags Instead of CSS
- 8 Accessibility & File Types/Editors Preferences
- 9 Customizing Your Favorite Objects

### 2 ENHANCING DREAMWEAVER® WITH EXTENSIONS 20:06

- 1 Downloading Extensions from the Exchange Site
- 2 Creating a Slideshow Using an Extension
- 3 Updating the Remote Site to View the Slideshow
- 4 Adding Flash® Buttons Using an Extension

### 3 GETTING STARTED WITH CASCADING STYLE SHEETS 44:20

- 1 Using CSS Styles to Redefine an HTML Tag
- 2 Creating a New Class Style
- 3 Adjusting Margins & Fonts for Tags
- 4 Creating CSS Link Styles
- 5 Working in the CSS Styles Panel
- 6 Creating CSS Styles Automatically
- 7 Formatting Text Using CSS Styles
- 8 Using CSS Styles to Align Images
- 9 Formatting & Adjusting a Bulleted List with CSS
- 10 Exporting & Attaching an External Style Sheet
- 11 Removing a Tag

### 4 CREATING CONTEXTUAL OR DESCENDANT STYLES 55:13

- 1 Setting Up the Page Properties
- 2 Defining Different Regions on the Page with Div Tags
- 3 Defining Formatting Styles for the Heading 1 Tag
- 4 Defining a Paragraph Tag to Control Text Spacing
- 5 Adjusting the Float to Align Images Left & Right
- 6 Redefining a Class Style within an Area of a Page
- 7 Creating a CSS Style to Adjust Cell Padding
- 8 Setting Negative Margins
- 9 Exporting Styles to be Used on Another Page in the Site
- 10 Attaching an External Style Sheet to the Page
- 11 Understanding CSS Hierarchy & Cascading
- 12 Looking at Inline Styles in Split View
- 13 Taking a Look at the Code

### 5 DESIGNING WITH DREAMWEAVER'S LAYERS 31:41

- 1 Deconstructing a Complex Design
- 2 Using a Tracer Image & Cloaking
- 3 Creating Layers
- 4 Adding Rollover Effects
- 5 Aligning with Guides & a Tracing Image
- 6 Ordering Layers with the Z Index
- 7 Adjusting Layers & Previewing in a Browser
- 8 Options for Alignment & Positioning

### 6 USING BEHAVIORS TO MAKE LAYERS INTERACTIVE 44:25

- 1 Setting Up the Art & Design Page
- 2 Using a Tracer Image & Layers to Place Graphics
- 3 Creating a CSS Text Style
- 4 Aligning Graphic Elements on a Page
- 5 Inserting Rollover Images
- 6 Going over the Navigation Plan for the Website
- 7 Setting CSS Style Rules for Behavior Layers
- 8 Setting Rollover Behaviors
- 9 Setting onClick Image Layers
- 10 Setting onClick Behaviors

### 7 SLICING WITH PHOTOSHOP® & FIREWORKS® 30:12

- 1 Slicing an Image in Photoshop
- 2 Exporting Sliced Images & Tables from Photoshop
- 3 Editing a Photoshop Sliced Design in Dreamweaver
- 4 Slicing & Optimizing Images in Fireworks
- 5 Exporting Sliced Images & Tables from Fireworks
- 6 Centering Tables for Design Flexibility
- 7 Inserting a Table Background Image

### 8 SAVING TIME WITH CSS & TEMPLATES 53:12

- 1 Getting a Table Design Started
- 2 Defining Table Regions Using CSS Styles
- 3 Adding a Header & Navigation Buttons
- 4 Formatting the Navigation Bar
- 5 Changing Table Cell Size & Alignment
- 6 Pasting Text & Creating a Type Style
- 7 Adding & Formatting Footer Elements
- 8 Aligning Text with Graphics
- 9 Save As Template & Insert Editable Region Commands
- 10 Creating Pages Based on a Template
- 11 Modifying Template-Based Pages
- 12 Using Image & Text Placeholders

### 9 COMBINING TEMPLATES, CSS, & BEHAVIORS 39:51

- 1 Detach Page from Template & Create Library Items
- 2 Applying Styles & Splitting Table Cells
- 3 Setting Alignment & Inserting Cells
- 4 Using Div Tags to Create Layers
- 5 Duplicating Layers in HTML Code
- 6 Inserting Placeholders & Adding Editable Regions
- 7 Applying Show-Hide Layers & Swap Image Behaviors
- 8 Pasting Text into a Template-Based Page
- 9 Selecting the Swap Images
- 10 Previewing in Multiple Browsers

### 10 ADDING MULTIMEDIA TO YOUR WEBSITE 22:56

- 1 Linking & Embedding Flash Audio Files
- 2 Adding Audio Controls & Disabling Autoplay
- 3 Embedding Video Files with Video Controls
- 4 Adding Parameters & Setting a Starting Frame
- 5 Launching a Video in a Separate Window
- 6 Setting Flash Video Properties & Play Options

### 11 CREATING CENTERED CSS LAYOUTS 28:07

- 1 Comparing Sites with Layers, Tables, & CSS
- 2 Setting Up a Container
- 3 Positioning Div Tags with Styles
- 4 Using Math to Position Properly
- 5 Troubleshooting Positioning & Viewing CSS Layout Backgrounds
- 6 Creating Styles within CSS Layers
- 7 Additional CSS Resources & Testing Tips
- 8 Demonstrating the Power of Flexible Accessible Design

### 12 TIPS & TRICKS 49:17

- 1 Backing Up Your Main Pages onto a Server
- 2 Making Changes & Uploading to a Server
- 3 Modifying Style Sheets on Pages & Templates
- 4 Working with Search Engines & Meta Tags
- 5 Browser Testing & Resources
- 6 Helpful Sites for Matching & Downloading Fonts
- 7 Creating an Email Form
- 8 Finding & Installing CGI Scripts
- 9 Customizing CGI Scripts
- 10 Uploading Forms & Files to a Server
- 11 Setting Permissions & Checking the Email Form
- 12 Using an Automated System to Install CGI Scripts
- 13 Final Comments & Credits
